Subject: Re: Mike, Jen Wilke indicated to me that last week, you suggested that "Week 2" of air monitoring begin on August 12 (tomorrow, Monday). Please clarify for me what you meant? So far there have been three (3) 24-hour samples collected that covered the first

Only once five 24-hours dredge day samples are met. It may start during the week of the 12th, should that condition be met.

Mike, Jen Wilke indicated to me that last week, you suggested that "Week 2" of air monitoring begin on August 12 (tomorrow, Monday). Please clarify for me what you meant? So far there have been three (3) 24-hour samples collected that covered the first days of dredging activity. When dredging resumes again on Monday August 12 and ends by Thursday, another 3 samples will have been collected. Let's discuss on Monday how these starts and stops of dredging impact the PAMP requirements.
